

DOYENSYS IS HIRING!

We are looking for career-focused individuals who are qualified in Oracle software and committed to customer service to fill 10 key positions in our new Summerside office.

DOYENSYS was incorporated in the US and India in 2006, and in Canada in 2017. Our mission is to be a leader in Oracle-based solutions and to use our extensive experience, proven methodologies, cutting edge tools, and established global delivery model to provide exceptional value and service to our customers.

We are in the final stages of launching our Canadian operations in Summerside. If you are passionate about Oracle technology and would like to join our team, here are the exciting career opportunities available:

Lift & Shift DBA Lead

Job description:

- Requires expertise in Oracle Cloud DBA with OEM and Oracle 12c.
- Support database-as-a-service initiatives for automating tasks that include database software installation, deployment, configuration, patching, backup, restores, and monitoring for the business requirements.
- Develop strategies, procedures and scripts to set up highly consolidated and management-simplified solutions for large, medium, and small Oracle databases.
- Achieve maximum reduction in hardware, software, storage, and administrative costs.
- Meet service level agreements for availability, performance, and data protection.

Oracle Cloud DBA & Chatbot Lead

Job description:

- Requires expertise in Oracle Cloud DBA with OEM and Oracle 12c.
- Support database-as-a-service initiatives for automating tasks that include database software installation, deployment, configuration, patching, backup, restores, and monitoring for the business requirements.
- Develop strategies, procedures and scripts to set up highly consolidated and management-simplified solutions for large, medium, and small Oracle databases.
- Achieve maximum reduction in hardware, software, storage, and administrative costs.
- Meet service level agreements for availability, performance, and data protection.

Web-services Lead

Job description:

- Develop and document functional requirements, test plans, test cases and procedures, and test automation for relational database services.

- Perform various types of testing, including functionality, compatibility, integration, regression, performance, stress, and error paths of database services.
- Responsibilities include operating the test environment in cloud; running and analyzing test results; performing diagnostics and troubleshooting; opening, prioritizing and triaging defects; tracking and reporting test status and results.
- Participate in development and operational reviews to maintain the company's high standards.
- Work with other teams to deliver and operate large-scale, distributed services in the cloud.
- Mentor test engineers and help build a fast-growing team.

Oracle Fusion HCM Technical Consultant

Job description:

- Manage all implementation and/or support projects in HCM modules, including core HR, absence, benefits, compensation, and talent management.
- Play a hands-on role in Oracle fusion data conversion, migration, and reporting.
- Responsible for the configuration of custom roles and security, workflow and approval process, and extensibility (flex fields and fast formula).

Oracle Fusion HCM Lead

Job description:

- Manage all implementation and/or support projects in HCM Modules, including core HR, absence, benefits, compensation and talent management.
- Play a hands-on role in Oracle fusion data conversion, migration and reporting.
- Responsible for the configuration/setup of custom roles and security, workflow and approval process, and extensibility (flex fields and fast formula).

Pre-Sales Leader and Program Manager

Job description:

- Plan, design, and proactively monitor the project progress, resolving issues and delivering on schedule.
- Manage budget and costs.
- Allocate resources and skills to ensure the smooth progression of all projects.
- Manage communications with all stakeholders.
- Work with multiple customers, acting as a liaison.
- Lead pre-sales, showcasing our solutions to prospective clients.

SOA Lead

Job description:

- Responsible for development and support of SOA-based technologies, mainly OSB and ODI.
- Troubleshoot with OSB, JAVA and ODI code to fix defects in production environments.
- Lead the team, drive production support solutions, and serve multiple customers.
- Support and manage all customer issues with OSB/ODI interfaces.
- Analyze the root cause of production incidents for middleware/integration support.

BI Lead

Job description:

- Engage with clients and lead the team to define business requirements.
- Conduct gap analysis between delivered functionality and client requirements, and recommend solutions.
- Expertise required in Oracle OBIEE, OBIA, and Informatica applications. Must be able to set up the system to meet the desired business processes and requirements.
- Develop and implement OBIEE/ OBIA solutions and integrate them with Oracle EBS and other 3rd party software in enterprise environments.
- Develop testing scenarios and test scripts, and lead teams in unit, integration and acceptance testing.

Bigdata Lead

Job description:

- Responsible for building and maintaining Big Data and Fast Data applications.
- Work with data center technology, such as converged infrastructure, storage, server, and/or networking in a work environment.
- Responsible for process development for loading, analyzing, and extracting data.
- Requires experience managing multiple teams.

Program Director

Job description:

- Lead projects involving multiple teams across the globe, ensuring technical, functional, and schedule alignment across all organizations.
- Manage and drive to completion projects led by the Oracle EBS Fusion project teams.
- Ensure cross-functional projects are tracked, managed, and communicated effectively to executive management and all stakeholders.
- Report regularly to senior management and serve as the key management interface point for cross-functional teams.
- Lead and drive cross-functional teams to meet program deliverables and quality criteria according to program milestones.
- Apply change, risk, and resource management in coordination with project managers.
- Determine risks, develop mitigation strategies, and communicate impacts.
