

City of Summerside

***The Speedway* to North American**

***GREEN* Markets**

City of
Summerside

Prince Edward Island
Canada

Summerside, Prince Edward Island, Canada

Recognized leader in renewable energy

The Summerside speedway to North American markets is a unique combination of a great many assets: strategic location, government support, fast-track loans, freedom from red tape, move-in-ready facilities, productive workers, and a Living Lab for launching products sooner. As a result, Summerside has become a leading developer of Green technology... and at one of the lowest costs in the G7.

- First-in-the-World Industrial Scale Solar Energy Storage System
- Smart Grid & Energy Efficiency
- Electric Vehicle Fleet
- Wind Farm
- Eco Waste & Water Treatment
- Green Building Practices

All eyes are on Summerside for good reason

Investors, site selectors and business leaders regard Summerside as “the city to watch” for growth in Green technology. With its unique municipally owned infrastructure and innovative business culture, the City continues to surprise even those businesses calling it home.

You make more money in Summerside

Both the PEI provincial government and Canadian federal government are allies in promoting the renewable energy industry to North American markets and beyond. In addition to a wide range of incentive programs, all levels of government are committed to success, a fact demonstrated by their substantial investments in infrastructure.

You save more cost in Summerside

The KPMG Competitive Alternatives report in 2016 revealed the true cost advantages of locating in P.E.I. The report modelled operating costs for several industries in over 200 jurisdictions around the world. For all of them, P.E.I. came out as one of the most competitive.

The opportunities for growth are huge

Summerside’s immediate plan is to add even more innovation in green technology by building on the infrastructure it already has. This opens the doors for rapid growth to companies wishing to exploit Summerside’s existing infrastructure to establish a North American presence, further their development and grow market share.

Summerside’s goals speed your success

Summerside has charted its course for expanded green impact along four distinct channels:

- Extending the scope of eco-technology
- Cultivating the adoption of innovative technologies
- Fostering the full-scale deployment of next-generation technologies
- Nurturing the growth of technology to enhance sustainable quality of living

SUMMERSIDE PEI – DEVELOPING AN ECONOMIC INNOVATION ECOSYSTEM

● ACHIEVED ● TO BE COMPLETED - - - - -

To realize the full potential of each of these channels, Summerside seeks the drive and commitment of like-minded organizations to participate as partners and share in the success. Here are just some of the applications reflecting our most recent ambitions:

- Electric Distributed Storage & Grid Integration
- EV Testing & Grid Integration
- Charging Technology with Storage for EVs
- Security & Surveillance
- Appliance Control
- Medical Home Care Solutions
- Advanced IT Testing for Renewable Systems
- Interoperability for Data Management

Your company gets all the support it needs

If your product is green, Summerside's infrastructure and comprehensive support system is at your command. There is no limit to the applications your company can develop and test in Summerside.

**SAMSUNG
RENEWABLE ENERGY**

“Without the sophisticated, diverse and robust infrastructure of Summerside, along with a forward-thinking and innovative community, we would not have been able to make this “first in the world” project a reality. Summerside has exceeded our expectations in terms of the breadth and depth of its infrastructure and openness to further renewable innovation.”

Sean Kim — Team Lead Solar & ESS Business, Samsung Renewable Energy

“Summerside is an ideal testing ground for innovative technologies and systems for companies looking at the North American market to grow. Having access to open infrastructure and expertise, both for product development and business development, is a key differentiator on why we selected Summerside for our North American base of operations.”

Joanna Huang — General Manager, HueGO Electric North America
